Commentary & Portfol	lio Updates		

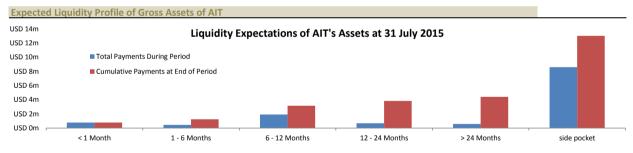

• AIT's NTA return was 2.34% for July. On a fixed exchange rate basis, the performance of AIT's continuing underlying funds for the month was -1.55%. The AUD weakened by 5.18% against the USD in July. This had a positive effect on AIT's NTA as the majority of AIT's net assets are USD denominated.

AIT Asset Allocation and Fund Performance for the Month by Strategy

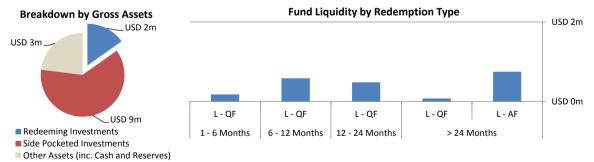

Liquidity of AIT

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd, together with a small investment held outside the Swap. With all debt repaid in August 2010, AIT is free to make distributions to unitholders. The first return of capital to unitholders under the revised investment strategy was made in August 2009. After the March 2015 distribution of AUD 0.04 per unit, AUD 1.76 per unit (230 million AUD in total) has been returned to unitholders since February 2009; distributions will continue to be paid as per the revised mandate.

Glossary. MDR - AF: Multi date redemption - Annual flow; MDR - QF: Multi date redemption - Quarterly flow; OFR: Once-off full redemption; L - AF: Liquidating Fund - Ad hoc flow; L - QF: Liquidating Fund - Quarterly flow

Note: Liquidity profiles are based on best available information and may be subject to significant change in light of new information or events.

Legal Notice: Laxey does not guarantee the performance of AIT, the repayment of any capital or any rate of return. Investing in any financial product is subject to investment risk including possible loss. Past performance is not a reliable indicator of future performance.

1 Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (AGAAP), as applied before the introduction of AEIFRS, have been used). The May 2007 monthly NTA performance was impacted by the AIT (previously EBI) rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The performance of the underlying investment portfolio (excluding the effect of the capital raising) for May 2007 was +2.40%. Adjustments due to Returns of Capital have been made to performances for 2009, 2011, 2012 and 2013.
