Commentary & Portfolio Updates

- AIT's NTA return was -2.82% for July. The USD weakened by 3.90% against the AUD in July. This had a negative effect on AIT's NTA as a significant portion of AIT's net assets are USD denominated.
- On 26 July 2017 Columbus Investment Services Limited ("Columbus") announced that it had removed Ernst & Young (ABN 75 288 172 749) as auditor of AIT and appointed Crowe Horwath Sydney (ABN 97 895 683 573).

Liquidity of AIT

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd. With all debt repaid in August 2010, AIT is free to make distributions to unitholders. The first return of capital to unitholders under the revised investment strategy was made in August 2009. After the July 2016 distribution of AUD 0.015 per unit, AUD 1.775 per unit (AUD 232 million in total) has been returned to unitholders since February 2009; distributions will continue to be paid as per the revised mandate.

AIT is now predominately exposed to Side Pocket type positions and Redeeming Investments which have been gradually liquidating for a number of years. This means it is difficult to predict the future liquidity of these funds and payments to AIT are made on an ad hoc basis when the cash is available to the funds.

Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (AGAAP), as applied before the introduction of AEIFRS, have been used).
