Commentary & Portfolio Updates

- AIT's January NTA is adjusted for the February distribution of AUD 0.13 per unit; taking this into account, AIT's NTA return was -0.13% for the month. AIT's continuing underlying funds returned +0.3% on a fixed exchange rate basis. Against this the AUD strengthened by +0.3% against the USD. This had a negative effect on AIT's NTA as the majority of AIT's net assets are USD denominated.
- AIT's annual report and accounts for 2012 was released on 26 February 2013 and is available to download from AIT's website. Please see the Investment Manager's Report for a summary of AIT's current position and an update on AIT's main holdings.

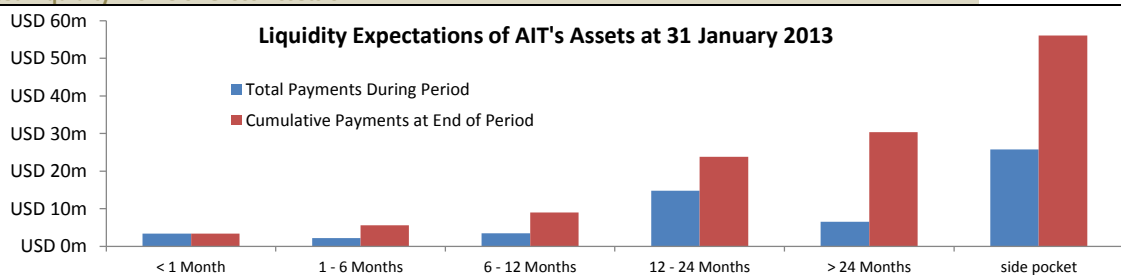

AIT Asset Allocation and Fund Performance for the Month by Strategy

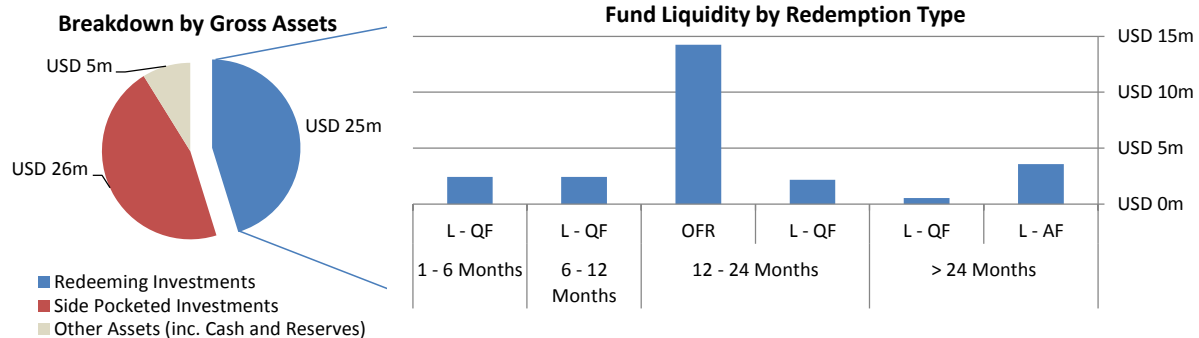

Liquidity of AIT

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd, together with two small investments held outside the Swap. With all debt repaid in August 2010, AIT is free to make distributions to unitholders. Returns of capital were made in August 2009 (AUD 0.47 per unit), February 2011 (AUD 0.38 per unit), October 2011 (AUD 0.15 per unit), January 2012 (AUD 0.15 per unit), June 2012 (AUD 0.15 per unit) and February 2013 (AUD 0.13 per unit). A total of AUD 1.43 per unit has been returned to unitholders since February 2009: distributions will continue to be paid as per the revised mandate.

1 Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (AGAAP), as applied before the introduction of AEIFRS, have been used). The May 2007 monthly NTA performance was impacted by the AIT (previously EBI) rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The performance of the underlying investment portfolio (excluding the effect of the capital raising) for May 2007 was +2.40%. Adjustments due to Returns of Capital have been made to performances for 2009, 2011 and 2012.
