

AIT *Alternative* Investment Trust

Alternative Investment Trust (AIT) has exposure to a portfolio of leading absolute return funds and a single direct investment in EBI Income Fund. With a revised investment strategy, the assets of AIT are being realised and the fund is being wound down.

Fund facts as at October 2010

Monthly return	0.40%	Net Assets (NA)	AUD 180,106,502
Unaudited NTA Oct 2010	AUD 1.378	Units in issue	130,692,470

Ticker	AIQ AU	ISIN	AU000000AIQ2

Commentary & Portfolio Updates

- For October 2010, AIT returned +0.4% in NTA terms. Again, exchange rate movements during the month had a major impact as the AUD strengthened by +1.7% against the USD. As the majority of AIT's assets are USD denominated, this had a negative impact on AIT's NTA. AIT's underlying funds performed well across most strategies and they returned +3.1% for the month on a value-weighted basis - using a fixed exchange rate - offsetting the effects of the exchange rate on AIT's NTA.
- At the end of the month, Laxey successfully negotiated the full sale of one of AIT's underlying fund positions - at a price close to NAV - which was under lock up until October 2011. The proceeds of approximately USD 6m were received in November, and will go towards AIT's next unitholder distribution.

AIT Asset Allocation and Fund Performance for the Month by Strategy

Liquidity of AIT

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd, together with a single investment in a fund held outside the Swap. As of August 2010, AIT has repaid all of its debt. As a result, AIT is free to make distributions to shareholders and will do so once sufficient cash is available. A large proportion of AIT's cash is held within a secondary swap with BNP; this is not due to come through to AIT until the end of 2010 (disclosed within 'Other Assets' until released). If this cash is included, the net cash position is now USD 40.7m.

Expected Liquidity Profile of Gross Assets of AIT

Breakdown of Gross Assets by Redemption Type of Underlying Funds

Glossary. MDR - AF: Multi date redemption - Annual flow ; MDR - QF: Multi date redemption - Quarterly flow ; OFR: Once-off full redemption ; L - AF: Liquidating Fund - Ad hoc flow ; L - QF: Liquidating Fund - Quarterly flow

Note: Liquidity profiles are based on best available information and may be subject to significant change in light of new information or events.

¹ Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (AGAAP), as applied before the introduction of AEIFRS, have been used). The May 2007 monthly NTA performance was impacted by the AIT (previously EBI) rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The performance of the underlying investment portfolio (excluding the effect of the capital raising) for May 2007 was +2.40%. 2009's performance is adjusted for the AUD 0.47 per unit distribution in August 2009.
