

# AIT *Alternative* Investment Trust

Alternative Investment Trust (AIT) has exposure to a portfolio of leading absolute return funds and a single direct investment in EBI Income Fund. With a revised investment strategy, the assets of AIT are being realised and the fund is being wound down.

## Fund facts as at April 2011

Monthly return	-3.45%	Net Assets (NA)	AUD 127,503,026
Unaudited NTA Apr 2011	AUD 0.976	Units in issue	130,692,470

Domicile	Australia	Responsible Entity	The Trust Company (RE Services) Limited
SEDOL	B1B0GT6		ACN 003 278 831 AFSL 235 150
Ticker	AIQ AU	ISIN	AU000000AIQ2

## Commentary & Portfolio Updates

- AIT's NTA return for April was -3.45% despite a strong performance across the underlying fund strategies; the funds produced a positive return of approximately 2.2% - on a value weighted, fixed exchange rate basis. However, this was more than offset by a weakening of the USD against the AUD (by -5.9%) - which negatively affected AIT's NTA.
- During April, there were USD 3.6m of new redemptions. Of this, USD 0.8m has been received in cash with the remainder due to come through to AIT in due course. The contributors were a mix of standard redemptions from funds such as Eton Park together with payments from liquidating and side pocket positions.

## AIT Asset Allocation and Fund Performance for the Month by Strategy

## Liquidity of AIT

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd, together with a single investment in a fund held outside the Swap. AIT finished repaying its debt in August 2010, and the Swap is now unleveraged. As a result, AIT is free to make distributions to shareholders and will do so once sufficient cash is available. Under the revised mandate, Returns of Capital have been made in August 2009 (AUD 0.47 per unit) and February 2011 (AUD 0.38 per unit); further unitholder distributions will be made once sufficient cash builds up from future redemptions.

## Expected Liquidity Profile of Gross Assets of AIT

## Breakdown of Gross Assets by Redemption Type of Underlying Funds

**Glossary.** MDR - AF: Multi date redemption - Annual flow ; MDR - QF: Multi date redemption - Quarterly flow ; OFR: Once-off full redemption ; L - AF: Liquidating Fund - Ad hoc flow ; L - QF: Liquidating Fund - Quarterly flow

**Note:** Liquidity profiles are based on best available information and may be subject to significant change in light of new information or events.

1 Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (AGAAP), as applied before the introduction of AEIFRS, have been used). The May 2007 monthly NTA performance was impacted by the AIT (previously EBI) rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The performance of the underlying investment portfolio (excluding the effect of the capital raising) for May 2007 was +2.40%. Adjustments due to Returns of Capital have been made to performances for 2009 and 2011.
