

AIT *Alternative* Investment Trust

Alternative Investment Trust (AIT) has exposure to a portfolio of leading absolute return funds and a single direct investment in EBI Income Fund. With a revised investment strategy, the assets of AIT are being realised and the fund is being wound down.

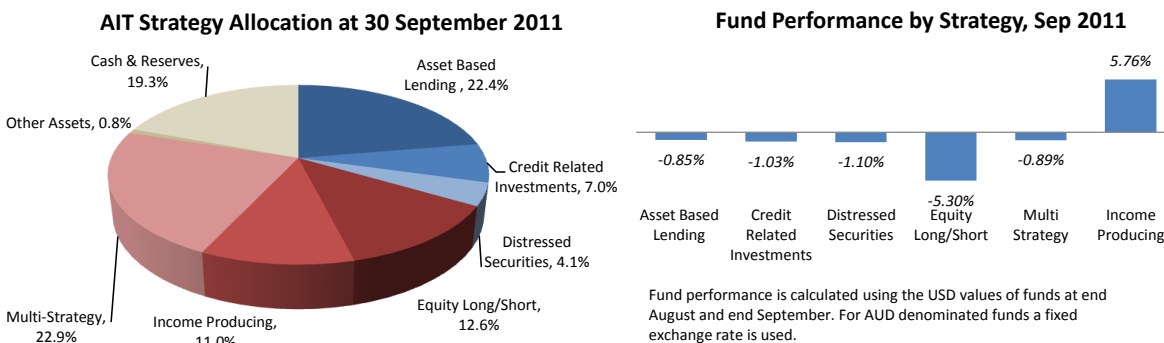

Fund facts as at September 2011

Monthly return	6.64%	Net Assets (NA)	AUD 136,542,554
Unaudited NTA Sep 2011	AUD 1.045	Units in issue	130,692,470

Ticker	AIQ AU	ISIN	AU000000AIQ2

Commentary & Portfolio Updates

- AIT's NTA return for September was +6.64%. The underlying funds produced a slightly negative return of -0.7% on a value weighted, fixed exchange rate basis. This was again more than offset by currency movements: the USD strengthened by +10.8% against the AUD. As AIT's assets are predominantly denominated in USD, this positively affected AIT's NTA.
- AIT's AUD 0.15 per unit return of capital was paid in October 2011. Although not reflected in this factsheet, as a result, AIT's NA and GA will both reduce by approximately AUD19.6m when the NAV for October is released.

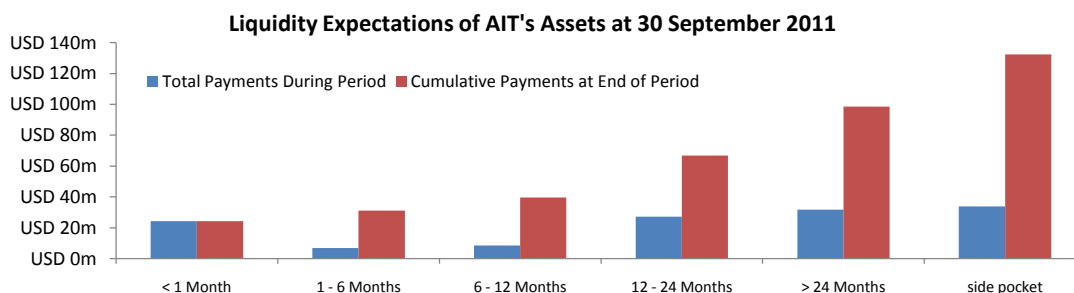

AIT Asset Allocation and Fund Performance for the Month by Strategy

Liquidity of AIT

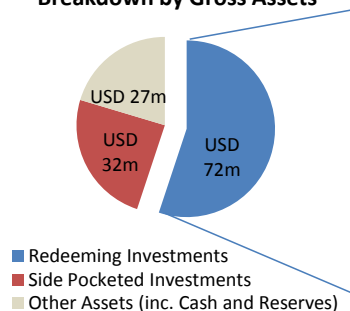

The portfolio of AIT consists of exposure to a basket of absolute return funds via a Swap facility with Macquarie Bank Ltd, together with a single investment in a fund held outside the Swap. With all debt repaid in August 2010, AIT is free to make distributions to unitholders. Under the revised mandate, Returns of Capital have been made in August 2009 (AUD 0.47 per unit), February 2011 (AUD 0.38 per unit) and October 2011 (AUD 0.15 per unit) - making a total of AUD 1.00 per unit since the revised mandate was adopted. Further distributions will be made once sufficient cash builds up from future redemption payments.

1 Unaudited – In calculating the NTA, AIT asset values have been calculated using unaudited absolute return fund performance estimates for the month being reported. For the purposes of calculating the above figures, the Australian Equivalents to International Financial Reporting Standards (AEIFRS) have been applied (other than for classification of net assets attributable to unitholders of AIT where Australian Generally Accepted Accounting Principles (GAAP), as applied before the introduction of AEIFRS, have been used). The May 2007 monthly NTA performance was impacted by the AIT (previously EBI) rights issue and placement which were completed that month and does not include the implied value of EBB shares received by investors who successfully participated in the EBI capital raising. The performance of the underlying investment portfolio (excluding the effect of the capital raising) for May 2007 was +2.40%. Adjustments due to Returns of Capital have been made to performances for 2009 and 2011.

AIT Top Holdings as at September 2011

Fund	Strategy	% Gross Assets
Drawbridge Special Opportunities	Asset Based Lending	22.35%
ESL Investments	Equity Long/Short	12.62%
EBIIF	Income Producing	10.95%
TPG-Axon Partners Offshore Ltd	Multi-Strategy	5.32%
Eton Park Overseas Fund Ltd	Multi-Strategy	3.88%
