Portfolio Update and Commentary

- AIT's NTA return was 0.87% for June 2018.
- The primary driver of AIT's positive performance was the weakening of the AUD relative to the Trust's largely USD denominated assets and cash. The currency effects were partially offset by a small decline in AIT's investment portfolio.
- As of 30 June 2018, 25% of AIT's commitment to the Warana 2018 Fund⁽¹⁾ had been called and paid. The fund has agreed to 25 transactions at an average price of approximately 58% of underlying reported net asset value. The largest position in the Warana 2018 Fund is a position in funds managed by King Street Capital (approximately 24% of the capital called thus far). As the transactions are yet to settle as at 30 June 2018, they are carried at cost on AIT's balance sheet.
- Warana and the RE intend to make further investments in accordance with AIT's investment strategy and will also continue to monitor the cash position of the Fund as cash is returned from AIT's existing investment portfolio.

About the Investment Manager of AIT

Warana Capital Pty Limited ("Warana") focuses on managing portfolios invested in third party funds and has core expertise in acquiring and managing funds acquired in the secondary market. The underlying funds and assets acquired are generally illiquid with uncertain holding periods to ultimate recovery. Warana has significant experience acquiring these funds at sufficient discounts to deliver absolute and annualised returns notwithstanding the time period and recovery uncertainty.

The Fund is structured as a unit trust and intends to distribute taxable income when and if available. We note however that as at the end of the 2017 tax year, the fund has in excess of \$400m in accumulated tax losses and in excess of \$20m in accumulated capital losses. Under certain circumstances and provided relevant legislative conditions are satisfied, these losses may be able to be applied against future taxable income to reduce the amount of taxable income and therefore the amount of any income distribution.

Other Information

The monthly NTA is released to the ASX and www.thealternativeinvestmenttrust.com by the 14th of each month and AIT factsheets are available from AIT's website and the ASX. Figures in the factsheet are based on the interim monthly data available at the time that the corresponding monthly NTA is released.

The net asset value of AIT is calculated by aggregating the valuations provided to AIT by the underlying fund managers and their administrators. Unaudited valuations are generally provided to AIT monthly and the funds are audited annually. Notwithstanding this process and based on its knowledge of the AIT funds and its experience on the secondary market, Warana believes that:

- it will likely take several years to fully receive liquidation proceeds and in that period AIT will be subject to either positive or negative performance; and
- if sold today, they would be liquidated at discounts to their prevailing net asset values.

Funds that are acquired in the Warana 2018 Fund⁽¹⁾ will generally be acquired at discounts to their reported valuations reflecting these factors. Please note that transaction settlement usually takes several months, and transactions are carried at cost (rather than underlying net asset value) until completed. Transactions may also not complete for a variety of reasons.
