(1) Accounting standards require that underlying funds be held at the valuations provided by their third-party administrators and auditors. This results in an immediate valuation uplift for funds purchased in the secondary market at discounts to this value. The Adjusted NTA adjusts the value of funds purchased in the secondary market using the lower of their reported valuations and the Warana's estimated projected recovery cash flows discounted at 10% p.a.

(2) Two private equity funds: Fortress Investment Fund V and Fortress Florida Coinvestment Fund, held in a US domiciled partnership.

Portfolio Update and Commentary

- During the month of October, the NTA and adjusted NTA of AIQ increased 20.6% and 6.6%, respectively.
- The Trust's performance was largely driven by an increase in Warana 2019 Fund, contributing 17.1% of NTA movement and 1.8% of the adjusted NTA movement. This fund published its Q3 2020 net asset value which included the settlement of a further 6 trades that were acquired at significant discounts in the period. Warana 2019 Fund has now completed over 30 trades at an average purchase discount of over 60% to the underlying managers valuations. As a reminder, AIQ's valuation policy and accounting standards require positions acquired on the secondary market to be carried at their audited underlying manager reported value once they have fully settled – hence the significant increase this month as these positions were acquired at a discount. The adjusted NAV we also publish, is not audited but reflects the values of these positions in line with our expected recovery which reflects the discount on acquisition. Please see "AIQ Valuation" on the next page for a more detailed explanation.
- The Trust's direct investment in ThinkSmart Limited position was up 48% during October, contributing 1.9% of NTA movement. FX movements contributed 2.2% NTA movement as the Australian dollar weakened slightly. These increases were offset by mild decreases in AIQ's legacy portfolio and the Warana 2018 Fund.
- During this month, AIQ received total US\$0.2mm distribution from the Warana 2018 Fund and, AIQ made a further net capital call of US\$1.0mm to the Warana 2019 Fund to fund further purchases expected in Q4. The opportunity set in the illiquid fund secondary market continues to be robust and attractive from a risk / return perspective. We anticipate deploying further capital in coming months including to a significant identified transaction that is close, but not yet fully agreed.

Investment Objective & Strategy

Investment Objective The objective of AIQ is to generate attractive pre-tax risk-adjusted absolute returns over the medium to long term while maintaining a focus on capital preservation.

Investment Strategy The strategy of AIQ is to gain exposure to a portfolio of leading international absolute return funds and selected direct investments in subordinated debt and equity co-investments.

Underlying Geographic & Cash Allocation (Incl. Look-through)

Note: The geographic allocation is estimated by the Investment Manager based upon available information and, therefore, may be inaccurate. The geographic allocation should be considered indicative only.

About the Responsible Entity of AIQ

Columbus is a member of One Investment Group ('OIG') which is an independent funds management business specialising in providing Responsible Entity, Trustee, Custody and Administration services. One Investment Group is responsible for in excess of 250 funds and \$17bn in a wide range of underlying asset classes including infrastructure, real estate, equities, fixed income, private equity and fund of funds. OIG is not a fund manager and its clients include global and Australian listed companies, sovereign wealth funds, banks, insurance companies, pension funds, private equity firms and boutique managers.

About the Investment Manager of AIQ

Warana Capital Pty Limited focuses on managing portfolios invested in third party funds and has core expertise in acquiring and managing funds acquired in the secondary market. The underlying funds and assets acquired are generally illiquid with uncertain holding periods to ultimate recovery. Warana has significant experience acquiring these funds at sufficient discounts to deliver absolute and annualised returns notwithstanding the time period and recovery uncertainty.

Distribution Policy

Subject to sufficient cash reserves, AIQ intends to distribute 5% per annum of the Trust's NTA, paid in semi-annual instalments. As at the end of the 2019 tax year, the Trust has in excess of A\$400m in accumulated tax losses and in excess of A\$20m in accumulated capital losses. Under certain circumstances and provided relevant legislative conditions are satisfied, these losses may be able to be applied against future taxable income to reduce the amount of taxable income and therefore the amount of any income distribution. Unitholders may reinvest distributions by purchasing additional units through the Trust's Distribution Reinvestment Plan ('DRP'). Participation in the Plan is optional and is open to all eligible unitholders. Further information is included in the published DRP.

AIQ Valuation

The monthly NTA of AIQ is released by the 14th of each month and is available from AIQ's website and the ASX. The NTA is unaudited and is calculated by aggregating the fair values provided by the underlying fund managers and their third-party administrators ('Manager Value'). Unaudited valuations are generally provided to AIQ monthly /quarterly and the underlying funds are audited annually. The investment funds are largely illiquid and Warana believes that:

- it will likely take several years to fully receive liquidation proceeds; and
- if sold today, many holdings would be realised at discounts to their prevailing Manager Value.

AIQ also makes investments in funds via the secondary market at a discount to the Manager Value. AIQ's advisors have concluded that accounting principles require that these positions be written up to the Manager Value once the trade has settled. Thus, AIQ applies the Manager Value to all funds (including look-through funds) in calculating its NTA. It generally takes 6-8 weeks to receive the Manager Values from the underlying funds, which causes a similar lag in the inclusion in the AIQ NTA.

When funds are acquired in the secondary market, they are often done so at a price that reflects Warana's expectation that ultimate recovery will be lower than the Manager Value and that recovery will take several years (hence the purchase discount to Manager Value). As an additional resource for Unitholders, AIQ has included an Adjusted NTA calculated by AIQ's Investment Manager to adjust for underlying funds that have been acquired in the secondary market ('Secondary Funds') at discounts to the Manager Value. It is intended as an additional indicative valuation resource given the re-valuation of Secondary Funds to Manager Value creates an immediate and significant valuation uplift. The Adjusted NTA is equal to the lower of the Manager Value and Warana's estimate of the projected recovery cash flows discounted at a 10% p.a. rate. The Adjusted NTA is indicative only and there is no assurance the value will be achieved - unitholders should take care in relying on this metric as it is not produced or reviewed by a third party to AIQ. Neither Warana nor the Responsible Entity make any express or implied warranty as to the completeness or accuracy of any projections, market outlooks or estimates used in estimating the Adjusted NTA. The Adjusted NTA is estimated using third-party information and other assumptions which may prove inaccurate.

Historical Performance

(See notes below)	NTA		Adjusted NTA	
	Diluted	Undiluted	Diluted	Undiluted
1 Month	20.5%	20.5%	6.6%	6.6%
3 Months	21.7%	21.7%	8.0%	7.9%
6 Months	9.8%	9.8%	1.6%	1.5%
YTD	28.3%	28.6%	11.1%	11.0%
Since Inv. Strategy Restart (p.a.)	14.9%	18.0%	5.8%	8.5%
Since IM Appointment (p.a.)	11.8%	14.4%	3.9%	6.3%

Note: The fund has conducted several capital raises to build scale since the commencement of its investment strategy on 12 February 2018. It conducted a 1-for-1 rights issue in March 2018, a 1-for-1 rights issue in August 2019, a placement in March 2020, a unit purchase plan in April 2020 and offers a distribution reinvestment plan. As a result of the new units issued at discounts to the NTA in some of these events, the NTA was diluted. Returns under the "Diluted" columns for each relevant time period show the movement including the impact of the dilution. Returns under the "Undiluted" columns for each relevant time period show the movement adjusted for the impact of the dilution. "Since Inv. Strategy Restart (p.a.)" returns are annualised returns since the investment strategy commencement. "Since IM Appointment (p.a.)" returns are annualised returns since Warana Capital was appointed as Investment Manager of AIQ on 9 October 2017. The Fund first produced an Adjusted NTA for the period ending 31 October 2019. Adjusted NTA performance relative to periods before this date utilise the regular NTA. Past performance is not indicative of future performance.

Other Information

Numbers in this factsheet are unaudited. For the period up to 31 October 2020 covered by this fact sheet there were no material changes to any of the following: the Trust's risk profile; the Trust's strategy; and key investment personnel related to the Alternative Investment Trust. For information since that date, please refer to either of the following websites www.thealternativeinvestmenttrust.com or www.oneinvestment.com.au/alternative-investment-trust.

Legal Notice

Columbus Investment Services Limited (ABN 69 095 162 931) (AFSL 221183) is the responsible entity of the Alternative Investment Trust (ARSN 112 129 218) ('Fund' or 'AIQ').
