(1) Accounting standards require that underlying funds be held at the valuations provided by their third-party administrators and auditors. This results in an immediate valuation uplift for funds purchased in the secondary market at discounts to this value. The Adjusted NTA adjusts the value of funds purchased in the secondary market using the lower of their reported valuations and the Warana's estimated projected recovery cash flows discounted at 10% p.a.

(2) Four private equity funds: Fortress Investment Fund IV, Fortress Investment Fund IV (Coinvestment), Fortress Investment Fund V and Fortress Florida Coinvestment Fund

## Portfolio Update and Commentary

- AIQ had a monthly NTA return of 9.1% and an Adjusted NTA return of 8.5% during the month of January (adjusted for the A\$0.0036 per unit distribution with ex-date 19 January 2022). The weaker AUD contributed 2.9% of both the NTA and Adjusted NTA movement.
- The investment portfolio had an overall positive performance during this month of 6.4% and 5.8% in NTA and Adjusted NTA terms, primarily driven by Warana 2021 Fund (the "Fund"), which was up 27% and 10% respectively. As a reminder, the Fund's primary investment strategy is investing in other funds via the secondary market at a discount to the fair values provided by the underlying fund managers and their third-party administrators ("Manager Value"). The positive movement of the Fund in both NTA and Adjusted NTA terms reflected the increase in valuation of positions as they settle into the Fund and the value paid in cash is marked up to underlying Manager Values (please see "AIQ Valuation" on the following page). The Fund continues to deploy capital with targeted net return at 20%. As of the latest Q4 2021 balance, the Fund has settled 20 trades and invested in over 40 investments, at discounts over 35% of the aggregated Manager Value.
- Post month end, the Trust made a total distribution payment of A\$1.0mm to all unitholders.

## Investment Objective & Strategy

**Investment Objective** The objective of AIQ is to generate attractive pre-tax risk-adjusted absolute returns over the medium to long term while maintaining a focus on capital preservation.

## About the Responsible Entity of AIQ

One Investment Group is an independent funds management business specializing in providing Responsible Entity, Trustee, Custody and Administration services. It operates multiple licensed entities to act as responsible entity and trustee for in excess of 300 registered and unregistered managed investment schemes. The total value of assets under administration by the group is in excess of \$35 billion across a wide range of underlying asset classes.

## About the Investment Manager of AIQ

Warana Capital Pty Limited focuses on managing portfolios invested in third party funds and has core expertise in acquiring and managing funds acquired in the secondary market. The underlying funds and assets acquired are generally illiquid with uncertain holding periods to ultimate recovery. Warana has significant experience acquiring these funds at sufficient discounts to deliver absolute and annualised returns notwithstanding the time period and recovery uncertainty.

## Distribution Policy

Subject to sufficient cash reserves, AIQ intends to distribute 5% per annum of the Trust's NTA, paid in semi-annual instalments. As at the end of the 2020 tax year, the Trust has in excess of A\$400m in accumulated tax losses and in excess of A\$20m in accumulated capital losses. Under certain circumstances and provided relevant legislative conditions are satisfied, these losses may be able to be applied against future taxable income to reduce the amount of taxable income and therefore the amount of any income distribution.

## AIQ Valuation

The monthly NTA of AIQ is released by the 14th of each month and is available from AIQ's website and the ASX. The NTA is unaudited and is calculated by aggregating the fair values provided by the underlying fund managers and their third-party administrators ('Manager Value'). Unaudited valuations are generally provided to AIQ monthly /quarterly and the underlying funds are audited annually. The investment funds are largely illiquid and Warana believes that:

- it will likely take several years to fully receive liquidation proceeds; and
- if sold today, many holdings would be realised at discounts to their prevailing Manager Value.

AIQ also makes investments in funds via the secondary market at a discount to the Manager Value. AIQ's advisors have concluded that accounting principles require that these positions be written up to the Manager Value once the trade has settled. Thus, AIQ applies the Manager Value to all funds (including look-through funds) in calculating its NTA. It generally takes 6-8 weeks to receive the Manager Values from the underlying funds, which causes a similar lag in the inclusion in the AIQ NTA.

When funds are acquired in the secondary market, they are often done so at a price that reflects Warana's expectation that ultimate recovery will be lower than the Manager Value and that recovery will take several years (hence the purchase discount to Manager Value). As an additional resource for Unitholders, AIQ has included an Adjusted NTA calculated by AIQ's Investment Manager to adjust for underlying funds that have been acquired in the secondary market ('Secondary Funds') at discounts to the Manager Value. It is intended as an additional indicative valuation resource given the re-valuation of Secondary Funds to Manager Value creates an immediate and significant valuation uplift. The Adjusted NTA is equal to the lower of the Manager Value and Warana's estimate of the projected recovery cash flows discounted at a 10% p.a. rate. The Adjusted NTA is indicative only and there is no assurance the value will be achieved - unitholders should take care in relying on this metric as it is not produced or reviewed by a third party to AIQ. Neither Warana nor the Responsible Entity make any express or implied warranty as to the completeness or accuracy of any projections, market outlooks or estimates used in estimating the Adjusted NTA. The Adjusted NTA is estimated using third-party information and other assumptions which may prove inaccurate.

Note: The Trust has conducted several capital raises to build scale since the commencement of its investment strategy on 12 February 2018. It conducted a 1-for-1 rights issue in March 2018, a 1-for-1 rights issue in August 2019, a placement in March 2020, a unit purchase plan in April 2020 and offers a distribution reinvestment plan. As a result of the new units issued at discounts to the NTA in some of these events, the NTA was diluted. Returns under the "Diluted" columns for each relevant time period show the movement including the impact of the dilution. Returns under the "Undiluted" columns for each relevant time period show the movement adjusted for the impact of the dilution. "Since Inv. Strategy Restart (p.a)" returns are annualised returns since the investment strategy commencement. "Since IM Appointment (p.a)" returns are annualised returns since Warana Capital was appointed as Investment Manager of AIQ on 9 October 2017. The first produced an Adjusted NTA for the period ending 31 October 2019. Adjusted NTA performance relative to periods before this date utilise the regular NTA. Past performance is not indicative of future performance.
